There are approximately 3.7 million PreK-12 students in Florida. In the 2016-17 school year, 46.4 percent of those students attended a school of their choice via open enrollment public schools, magnet programs, public charter schools, publicly-supported scholarship programs (Florida Tax Credit Scholarships, Gardiner Scholarships, McKay Scholarships), private schools, career and professional academies, home education, full-time virtual instruction and voluntary pre-k (VPK) programs. That means nearly 1.7 million PreK-12 students in Florida attended a school other than the one to which they are residentially assigned by their zip code. In general, do you believe that allowing students to attend a school other than the one which they are residentially assigned is beneficial or harmful to the state's education system?

As you may know, Florida was one of the first states in the country to offer free prekindergarten to all 4-year-olds. The program, named the Voluntary Pre-K Program (Pre-K), allows parents to enroll their child in a private, public, charter, or specialized pre-k program. It is estimated that nearly 80 percent of Florida's 4-year-olds attend a preschool through the VPK program. In general, do you support or oppose Florida's Voluntary Pre-K Program? (1 of 2)

An "Education Scholarship Account" is a flexible education scholarship that parents can use to pay for their child's education. Instead of sending a child's share of education funding directly to a public school like most districts do now, funds are deposited into an Education Scholarship Account that parents can use to pay for a variety of uses, including private school tuition, tutoring, therapy, online education, curriculum and other state-approved educational services. In general, do you support or oppose Education Scholarship Accounts? (1 of 2)

Florida is also home to the nation's largest private education choice program, the Florida Tax Credit Scholarship Program. This program provides low-income children with more learning options by providing private school tuition scholarships based on financial need. The average annual household income of participants is \$25,749, though a family of four can have an income of up to \$50,200. Currently, more than 100,000 low-income students attend a private school with such a scholarship. In general, do you support or oppose the Florida Tax Credit Scholarship Program? (1 of 2)

Florida lawmakers are considering expanding the state's Education Scholarship Account program, such that many more students would be eligible to participate. Instead of sending a child's share of education funding directly to a public school, under this program participating parents could elect to have their child's funds deposited into an education scholarship that parents could use to pay for a variety of uses, including private school tuition, tutoring, online education, curriculum, therapy, and other state-approved educational services. In general, do you support or oppose the expansion of Florida's Education Scholarship Account program such that many more students would be eligible to participate? (1 of 2)

Some people in the state have talked about capping participation in this new Education Scholarship Account program. Which scenario do you prefer? (1 of 2)

			No caps on participation: All students who meet the eligibility criteria would be eligible to participate.	A modest cap on participation: No more than 30,000 students would be eligible to participate in the first year. This amount is equivalent to 1% of the statewide public school enrollment of 3 million students.	A tight cap on participation: No more than 15,000 students would be eligible to participate in the first year. The statewide public school enrollment grew by nearly 20,000 students in the past year. Some people in the state have talked about capping participation in this new Education Scholarship Account program. Which scenario do you prefer? (2 of 2)

		No caps on participation: All students who meet the eligibility criteria would be eligible to participate.	A modest cap on participation: No more than 30,000 students would be eligible to participate in the first year. This amount is equivalent to 1% of the statewide public school enrollment of 3 million students.	A tight cap on participation: No more than 15,000 students would be eligible to participate in the first year. The statewide public school enrollment grew by nearly 20,000 students in the past year. If a cap on participation was put in place, would you support making this cap grow to meet student demand? (1 of 2)

		I support eliminating the participation cap after a few years.	I support growing the participation cap slowly over time, if there is student demand.	I support keeping the participation cap in place.	Don't know	Weighted Total	Total
